## SOVIETS DO NOT FEAR THREAT OF ATOMIC WEAPONS

The people of the Soviet Union are firmly opposed to the use of atomic weapons; however, at the same time, they are not afraid of the Imperialists' threat of using atomic weapons. On 17 September 1954, the Tass News Agency reported that the USSR had carried out tests of a certain type of atomic weapon, and that the results of the tests provided valuable information for defense against atomic weapons. The tests also confirmed that there is complete defense against the atomic bomb. Imperialist fabrications that there is no defense against the atomic bomb have been shattered. At present, Soviet troops are making complete preparations against an atomic attack so that both defensive and offensive missions can be undertaken smoothly in an atomic war. Therefore, the powerful Soviet Union does not fear atomic weapons at all.

These photographs, which have been reproduced from the <u>Soviet Military Forces Pictorial</u>, [possibly the <u>Illustrated Gazette</u>] show Soviet Troops undergoing training for defense against atomic weapons.
